

## Investment Philosophy

- Seeks to deliver attractive risk-adjusted returns through an actively managed core portfolio of U.S. investment-grade bonds
- Invests opportunistically around the core using sovereign, credit and currency strategies to add income and price appreciation potential
- Offers a complement to U.S.-only “total return” strategies

A LEGG MASON COMPANY

Managed by Brandywine Global, a mid-sized boutique firm specializing in strategies that seek to capture value anomalies across investment markets. Brandywine is a signatory of the UN-Principles for Responsible Investment (PRI)

## Investment Process

### Combination of Top-Down and Bottom-Up

#### Macro Process

Where is the information opportunity?  
What is the information risk?

#### Valuation Process

Where is the valuation opportunity?  
What is the price risk?

#### Value Analysis

- The manager believes interest rates and exchange rates move toward their long-term averages over time.
- Their process seeks market levels that are at extremes—and may be due to normalize.
- The manager pairs this world view with a search for issuers with fundamental characteristics that add a potential margin of safety to attractive valuations.
- The manager evaluates the risk/reward profile of appealing opportunities for inclusion in the portfolio.

In selecting non-U.S. securities, the team will actively manage currency exposure—and may at times invest pro-actively in currencies.

## Fund Objective

Seeks to maximize total return consisting of income and capital appreciation.

## How the Fund Invests

Under normal circumstances, the Fund will invest at least 80% of its net assets, plus borrowings for investment purposes, in a diversified portfolio of U.S. and foreign bonds or other debt securities of varying maturities and other instruments that provide investment exposure to such debt securities, including forwards or derivatives such as options, futures contracts or swap agreements.

Performance as of 9/30/18

	1 Month	3 Month	YTD	1 year	3 year	Since Inception (7/6/15)
Class A (NAV)	-0.57%	-0.05%	-0.15%	0.19%	2.74%	1.86%
Class A (MOP)	-5.04%	-4.54%	-4.66%	-4.35%	1.18%	0.42%
Class I	-0.55%	0.02%	0.04%	0.44%	2.98%	2.12%

ICE BofAML USD 3-Month Deposit Offered Rate Constant Maturity Index	0.18%	0.58%	1.50%	1.79%	1.10%	1.04%

Performance data for periods before 5/31/18 reflects previous management style, and holdings, and is not indicative of current portfolio holdings.

Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance data may be higher or lower than actual data quoted. For the most current month-end performance data please call 1-888-310-0416.

Maximum Offering Price (MOP) for Class A shares includes the Fund's maximum sales charge of 4.50%. Performance shown at NAV does not include these sales charges and would have been lower had it been taken into account.

Returns over one year are average annual returns.

As of 6/15/2018, the 1290 Diversified Bond Fund was restructured, which included, among other things, the Fund adopting a new broad-based benchmark that is reflective of its universe of holdings. The previous benchmark, the ICE BofAML USD 3-Month Deposit Offered Rate Constant Maturity Index was the comparable benchmark under the previous manager and strategy, effective from inception on 7/6/2015 thru 6/15/2018.

Sector Weightings as of 9/30/18

Government/Government Related	39.32%
US	28.31%
Non-US	11.01%

Corporate Bond - High Yield	1.64%
Bank Loans	0.00%
Cash and Other Securities	4.40%

(note: includes derivative P&L) Subject to change.

For the credit quality ratings shown above, the rating is the result of a composite algorithm based on an average of the ratings from three nationally recognized statistical rating organizations: Moody's, S&P and Fitch. If only two of the recognized agencies rate a bond, the composite rating is based on an average of the two. Likewise, if only one of the agencies rates a bond, the composite rating is based on that one rating. Credit quality is measured on a scale that ranges from AAA (highest) to D (lowest). Credit quality does not remove market risk and is subject to change.

Risks

This material must be preceded or accompanied by the prospectus.

Effective June 15, 2018 the 1290 Unconstrained Bond Managers Fund was changed to 1290 Diversified Bond Fund. Please refer to prospectus for more information.

Principal Risks:

**Investment Grade Securities Risk:** Debt securities are generally considered to be investment grade if they are rated BBB or Higher.

**Credit Risk:** The Fund is subject to the risk that the issuer or the guarantor of a fixed income security is unable or unwilling to make timely principal and/or interest payments.

**Foreign Securities Risk:** Investments in foreign securities involve risks not associated with investments in U.S. securities. Foreign markets may be less liquid, more volatile and subject to less government supervision and regulation than U.S. markets. Security values, also may be negatively affected by changes in the exchange rates between the U.S. dollar and foreign currencies. There are greater risks involved in investing in emerging market countries and/or their securities markets, and investments in these countries and/or markets are more susceptible to loss than investments in developed countries and/or markets.

**Bloomberg Barclays U.S. Aggregate Bond Index** covers the U.S. dollar denominated investment-grade, fixed-rate, taxable bond market of securities. The index includes bonds from the Treasury, government-related and corporate securities, agency fixed rate and hybrid

adjustable mortgage pass through securities, asset-backed securities and commercial mortgage-backed securities.

**ICE BofAML USD 3-Month Deposit Offered Rate Constant Maturity Index**, formerly known as the BofA Merrill Lynch U.S. Dollar 3-Month LIBOR Constant Maturity Index, tracks the performance of a synthetic asset paying the London interbank offered rate (LIBOR) to a stated maturity. The index is based on the assumed purchase at par of a synthetic instrument having exactly its stated maturity and with a coupon equal to that day's fixing rate. That issue is assumed to be sold the following business day (priced at a yield equal to the current day fixing rate) and rolled into a new instrument.

**Average effective duration** is a measure of a fund's interest-rate sensitivity-- the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. **Yield to maturity** is the rate of return anticipated on a bond if held until the end of its lifetime.

**30 Day SEC Yield** represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the 30-day period. This reflects fee waivers and/or expense reimbursements during the period. Without waivers and/or reimbursements, yields would be reduced.

**30 Day Unsubsidized Yield** does not adjust for any fee waivers and/or expense reimbursements in effect.

The Fund may not be successful in implementing its investment strategy or may not employ a successful investment strategy, and there can be no assurance that the Fund will grow to or maintain an economically
